

## Annual Crop Prices – for BTC and South Caucasus Pipelines Compensation Calculation

Below is crop price data that BP will use as the basis for calculating crop compensation. Crop price data was received from both a local NGO and the BP Land Acquisition Team who carried out their own survey. A local auditing firm then carried out additional surveys and analysis to determine a final price. For crops where no price is listed, it is assumed that people in that district do not grow such crops. If a farmer is growing a crop for which there is no price information, the price will be worked out on a case-by-case basis.

PRODUCTS	CROP PRICES (GEL/Kg)						
	GARDABANI	MARNEULI	TETRISKARO	TSALKA	BORJOMI	AKHALTSIKHE	ADIGENI
Winter wheat(local)	0.23	0.24	0.26		0.30	0.27	0.20
