

## Environmental Action Plan, Guangxi Fenglin Forestry Development Co. Ltd..

February 10, 2004

Item	Description	Completion Date
1	Commission scoping study to: (i) review management of Fenglin's own plantations and develop an action plan to achieve independent certification of sustainable forest management and use to World Bank Group requirements; (ii) advise the extent to which Fenglin can demand evidence of sustainable forest management from its third party suppliers.	June 2004
2	Implement study recommendations and obtain third-party certification of plantation management practices.	June 2007
3	Design and implement schemes to source fiber in the form of wood waste from local saw-millers rather than as logs.	January 2005
4	Undertake an Occupational Health and Safety audit, and develop a timed safety-improvement action plan.	June 2004
5	Develop occupational health and safety and environmental management systems at Nanning and Baise, and obtain certification of these systems to OHSAS 18001 and ISO 14001 or equivalents respectively.	June 2007
6	Enhance boiler and thermal fluid heater flue gas treatment (at Nanning) such that emissions from these heaters meet Chinese and IFC standards for emissions of NO <sub>x</sub> , SO <sub>2</sub> and particulates.	December 2004
7	Measure emissions of NO <sub>x</sub> , SO <sub>2</sub> and particulates from the fired heater at Baise and if necessary enhance flue gas treatment such that these emissions meet Chinese and IFC standards.	December 2004
