|                   | 7.5        | Delayed Explosion Worst Case Radii                                       |
|                   | 7.6        | Delayed Explosion Worst Case Radii                                       |
|                   | 7.7        | Delayed Explosion Worst Case Radii                                       |
|                   | 7.8        | Radiation Vs Distance for Fireball                                       |
|                   | 7.9        | Early Explosion Overpressure vs Distance                                 |
|                   | 7.10       | Maximum Concentration Footprint                                          |
|                   | 7.11       | Intensity Radii for Jet Fire                                             |
|                   | 7.12       | Late Explosion Worst Case Radii                                          |
|                   | 7.13       | Thermal Intensity for Late Pool Fire                                     |
|                   | 7.14       | Event Tree for Gas Release from the Gas Holder                           |
|                   | 7.15       | Fault tree for Gas Release from the Gas Holder                           |
| <b>Chapter 8</b>  | 8.1        | Emergency Response Team                                                  |
| <b>Chapter 10</b> | 10.1       | Environmental Management Cell                                            |

### List of Annexure

| Chapter No.       | Annexure No. | Item                                                                                                                         |
|-------------------|--------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>Chapter 1</b>  | 1.1          | Certificate of Incorporation Consequent upon Change of Name                                                                  |
|                   | 1.2          | Environmental Clearance Letter (Existing Plant), Consent to Establish (Existing Plant) & Consent to Operate (Existing Plant) |
|                   | 1.3          | Terms of Reference issued by MOEF's 85 <sup>th</sup> EAC Meeting dated 23 <sup>th</sup> -25 <sup>th</sup> September 2008     |
| <b>Chapter 2</b>  | 2.1          | Approvals for water abstraction @2.5 MGD from Pennar River bed and @5.0 MGD from Gandikota Reservoir                         |
|                   | 2.2          | Agreement for Purchase of Granulated Blast Furnace Slag with M/s. Penna Cement Industries                                    |
| <b>Chapter 3</b>  | 3.1          | Landuse Pattern in the Study area as per Census 2001                                                                         |
|                   | 3.2          | Percentage Frequencies of Ground Based inversions with various top heights (00GMT & 12GMT) at Hyderabad                      |
|                   | 3.3          | Detailed Table of Ambient Air Quality in the Study Area (Summer Season)                                                      |
|                   | 3.4          | Detailed Table of Ambient Air Quality in the Study Area (Winter Season)                                                      |
|                   | 3.5          | Demographic profiles of the Study area                                                                                       |
|                   | 3.6          | Literacy level in the Study Area                                                                                             |
|                   | 3.7          | Distribution of Workers & Non-Workers                                                                                        |
|                   | 3.8          | Occupational distribution of Main Workers                                                                                    |
|                   | 3.9          | Occupational distribution of Marginal Workers                                                                                |
|                   | 3.10         | General Amenities in the Study Area                                                                                          |
| <b>Chapter 4</b>  | 4.1          | Water Conservation and Development                                                                                           |
| <b>Chapter 11</b> | 11.1         | List of Accreditation                                                                                                        |
|                   | 11.2         | Experience Statement                                                                                                         |
|                   | 11.3         | Detailed CV of Team Members                                                                                                  |
