

TRP Expansion (ARGENTINA)

Environmental and Social Action Plan (ESAP)

#	Action	Indicator	Deadline
1	Construction/Demolition ESHS Management Plans: Develop an Environmental, Social, Health & Safety (ESHS) Management Plan for the reshaping of Pier 3 and refurbishment of the passenger terminal based on: i) the existing Environmental Impact Assessment dated 27/11/09; ii) applicable IFC Performance Standards and iii) IFC EHS Guidelines and other internationally recognized standards. The Plan will include, among other, the following components: a. Procedure for Use and Transport of Explosives: Develop a specific procedure for the use, transport, handling and storage of explosives. This procedure should be aligned with local regulations and recognized international good practices, including relevant sections of the following IFC's EHS Guidelines: i) "Extraction of Construction Materials: "Explosives" and "Explosives Safety" and ii) Mining: "Noise and Vibration" and "Use of Explosives" b. Procedure for Sediment Control: Develop a specific procedure for sediment control based on recognized international good practices and IFC's EHS Guidelines. c. Procedure for Debris/Soils Management and Disposal: Develop a specific procedure to manage, handle and dispose of the materials and soils that will result from the project, including verification of the environmental management and licenses of final disposal sites, and specific measure to avoid any debris from falling into river. The procedure will include soil testing to ensure that the selected disposal method correspond to actual soil conditions.	Construction/Demolition ESHS Management Plan and specific procedures in form and substance acceptable to IFC	a) Condition of 1 st Disbursement
2	Grievance Redress Mechanism: Define an accessible mechanism and allocate responsibility internally to receive, register and respond to communications, comments and grievances from surrounding community and other external stakeholders..	Provide copy of Grievance Redress Mechanism in forma and substance acceptable to IFC	a) Condition of 1 st Disbursement

3	EHS Management System (EHSMS): Adopt IFC's Performance Standards as part of TRP's ISO 14,001 Legal and Other Requirements and adopt IFC's EHS General Guidelines and Harbors and Port Terminals Guidelines as good practices, and introduce changes in the EHSMS as required. It will include an update of the Communications procedure to allow public access to relevant environmental information (i.e. Environmental Impact Assessments) and a Grievance Redress Mechanism for external stakeholders (see item 2 above)	Provide copy of revised documentation of the EHSMS in form and substance acceptable to IFC	a) Condition of 2 nd Disbursement
