

NephroPlus (34679)
Environmental and Social Action Plan (ESAP)

	Action	Deliverable	Due Date
Community Health, Safety and Security			
1.	Life and Fire Safety Certification NephroPlus will submit a life and fire safety (L&FS) review to IFC that identifies major fire risks, applicable codes, standards and regulations, and mitigation measures for all facilities (existing and new). Scope of review should be responsive to all national requirements and an internationally recognized fire and life safety code, as required by the life and fire safety section of the WBG EHS General Guidelines, and a disaster response plan for earthquakes, fires and other large scale emergency situations. Specific milestones for this action item will include: (i) Completion of review for existing facilities; and certification of design; agree with IFC on a mutually acceptable time frame to implement the recommendations for existing facilities. (ii) Develop standard operating procedures and life and fire safety design specifications applicable to the design and operation of new facilities.	Documentary Evidence - Copy of Contract - Design certification and L&FS review. - Post completion certification - Annual Monitoring Report (AMR)	(i) + 90 days (ii) +180 days
