ESAP

	Project Name:	Atopco Beef
	Team Name:	Gbl Ind, Manufact, Agribus & Services
	Country:	China
	Lead Environmental Specialist (LESS):	
Delete	Action ID	Task Title/Description *
		Dedicate a (part time) sustainability manager at corporate level to oversee the development of corporate sustainability policy and ESMS and monitor the subsidiaries' E&S performances.

		Review (with the help of external consultant, as needed) KPC's existing environmental, occupational health and safety (OHS) and food safety management policies, manuals, plans, procedures and programs (including emergency management and staff E&S training) and revise and incorporate them into an overarching corporate sustainability policy and environmental and social management system (ESMS) including food safety manual and procedures which can be further customized and localized into the facility level manuals. The ESMS system will define roles and responsibilities of corporate and facilities, consists of necessary elements including operational manuals and procedures consistent with ISO 14001, ISO 22000 and IFC Performance Standard 1 to enable Atopco to comply with Chinese environmental, social and food safety laws and regulations, IFC Performance Standards, and applicable aspects of World Bank Group (WBG) EHS Guidelines and regularly monitor the compliance of the subsidiaries activities. The ESMS will define roles and responsibilities of subsidiary EHS manager and require all subsidiaries to establish, prior to productions and through customizations of the company's corporate ESMS and food safety manual and procedures, their own environmental management plans, OHS management practices or systems, emergency preparedness and response plans and staff E&S training programs to comply with applicable local environmental, OHS and fire safety legal requirements and applicable aspects of WBG EHS Guidelines; and for food safety, their own food safety manuals to comply with local food safety legal requirements and align with good international practices including Hazard Analysis Critical Control Points (HACCP) and Codex Alimentarius.
