VV_CH_005	BZ-I-s-B-02231	46812.02	The archaeological site from Gherăseni - Movila Cremenea. The site is located in the N corner of the village, on the right bank of the Călmățui stream, near the confluence with the Șângărau stream. The mound has a height of about 4 m and an elongated shape, due to clay mining in the XXth century. Three stone crosses are still preserved on the upper part. The multi-layered Eneolithic settlement presents an archaeological deposit that reaches over 2 m. Pits, the remains of burned and unburned dwellings and a large amount of archaeological material were discovered. The Eneolithic settlement was superimposed by a cemetery from the late medieval period. It includes the below three sub-sites. BZ-I-s-B-02231.01, BZ-I-s-B-02231.02, BZ-I-s-B-02231.03.	Settlement, Funerary	Eneolithic, Era	Medieval	Gherăseni	Yes	Medium	45.03370284, 26.80346181
VV_CH_006	BZ-I-s-B-02249	49590.01	The archaeological site of Moisica The site is located NW of the village, up to the mound near Călmățui, in the lower meadow to the right side of Călmățui and on the high terrace at the edge of the village. The site occupies the low meadow to the right of	Settlement	Migration era, III-IV AD Modern era, XIX century mill. BC	Eneolithic, V	Smeeni	Yes	Medium	45.0015869, 26.89382559
